**VERTEX LASER HAIR REMOVAL DEVICE
POWERFUL AGAINST EXCESS HAIR**

Introducing Vertex

Vertex, the newest hair removal device with its new technology, has revolutionized the medical laser industry. Vulcano handpiece with a 5cm² spot size gives you an amazing speed. We have controlled and guided the power of the volcano in a new applicator called Volcano. With the support of simultaneous wavelengths and the intelligent Redshift system, it is possible to remove unwanted hair for all skin and hair types. With a great internal cooling system, the treatment steps will be completely safe and painless. The device is very simple to use and shines like a diamond in your clinic with a wonderful design. This is not a slogan, we have tried to make a device that works forever.

50% faster

Volcano handpiece equipped with 5 cm spot size, now you can experience an extraordinary speed during treatment.

Redshift system

Volcano's new handpiece with Redshift system controls 3 simultaneous wavelengths, which increases the effectiveness for all skin types.

Ergonomic handpiece design

The design of the handpiece is done using ergonomic principles in a way that reduces the damage to the body in repetitive and long movements.

15" Smart Screen

The 15-inch screen with smart interface makes a very simple and exciting experience, while working.

Selectable lighting system

Vertex is equipped with a selectable lighting system that creates a unique harmony with the environment of your clinic.

Amazing cooling system

Vertex device uses two types of internal cooling system to cause a gentle cold for the skin in every stage of the treatment.

4 Wavelengths

It has four wavelengths (1064nm, 810nm, 755nm, 940nm)

POWERFUL DOUBLE COOLING

Vertex device uses two types of internal cooling system to cause a gentle cold for the skin in every stage of the treatment.

Continuous cooling of the laser contact surface with the skin makes the whole treatment process painless and completely comfortable. Advanced skin cooling technology continuously throughout the treatment.

We have controlled and directed the volcano energy by having an intelligent cooling system.

Two excellent technologies, TEC COOLING + TEC CHILLER, which perform cooling operations in a completely intelligent manner, continuously and completely silent. Silent cooling system will make your clinic more relaxed.
